

Full-Stack Developer (Located in Bulgaria)

Job description:

Currently we are looking for a **Full-Stack Developer** for one of our business partner's team, working on innovative big data platform for the maritime industry. The solution is designed to enable continuous access to data both onboard and onshore through an interactive web based solution and to provide an efficient information flow.

Requirements:

- 3+ years of professional experience with software development
- Experience with C#, .NET
- Experience with ASP.NET Web API
- Experience with databases such as MS SQL Server and NoSQL
- Experience or knowledge about front-end development with Angular and TypeScript
- Familiar with unit test frameworks
- Familiar with design patterns
- Experience with Azure DevOps
- Familiar with Azure cloud fundamentals
- Containerization (Docker, Kubernetes)
- Strong Agile principles understanding
- Excellent spoken and written English

What we offer:

- An exciting and important position working for the world-leading supplier of maritime solutions
- Friendly and collaborative working environment
- Attractive remuneration package
- Work-life balance: flexible working hours, 20 to 24 paid vacation days depending on the years with the company, home office opportunity
- All kinds of office and other additional benefits (sports card, additional healthcare package subsidizing, special discounts, drinks and ice-cream at the office and others)

How to apply?

Send us your up to date CV in English to: support@codeacademy.bg

All applications will be treated in strict confidentiality. Only short-listed candidates will be contacted.
